

Rehabilitation and Injury Care

Pediatric Physical Therapy

Kids have fun at Sutton Place Physical and Aquatic Therapy!

Our pediatric physical therapy (PT) program is specifically designed for kids and teens who cannot move with ease, with disease, or disability.

In the privacy of our offices, we offer kids and teens a customized PT program which includes Balance Training, Bike Re-education, Manual Therapy, Paraffin, Strength Training, Treadmill, TRX, Pilates and our extremely popular computerized pool in our own private pool.

Our highly trained physical therapists have extensive experience working with kids and teens in both land and aquatic therapy. Your child or teen will work exclusively with one of our physical therapists to help build strength, improve movement, and gain the confidence needed to complete daily activities. Also, our physical therapists can help identify existing and potential physical, psychiatric, and school personnel about an individual education plan (IEP), provide instructions for home exercise programs, and recommend when returning to sports is safe.

Even though you do not need a prescription for a pediatric PT evaluation, doctors recommend Sutton Place Physical and Aquatic Therapy for patients with:

- Sports injuries
- Autism and other developmental delays
- Cerebral Palsy
- Neuromuscular disorders, such as Duchenne Muscular Dystrophy
- Orthopedic disabilities/injuries
- Heart and lung conditions
- Birth abnormalities such as spina bifida
- Effects of in-utero drug or alcohol exposure
- Acute trauma
- Head injury
- Limb deficiencies
